Pre-Course Survey

1.] What is your name?_____

2.] What is your gender?_____

3.] What is your major?_____

4.] Circle your class standing: freshman, sophomore, junior, or senior.

5.] Consider the following statement: "I feel confident applying mathematical concepts from calculus to solve quantitative problems."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

6.] Consider the following statement: "I can approach a calculus problem in more than one way (for example, algebraically, graphically, or numerically)."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

7.] Consider the following statement: "When faced with a challenging calculus problem, I am confident I can find a way to solve it."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

8.] Consider the following statement: "In past math courses, using technology helped me to stay engaged with the material."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

9.] Consider the following statement: "I believe technology can make learning calculus less intimidating."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

10.] Consider the following statement: "I believe technology can help me better understand abstract calculus concepts."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

11.] Consider the following statement: "I believe technology can be used to visualize and experiment with mathematical ideas."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

12.] Consider the following statement: "I am confident in my ability to learn and use new technological tools to help me understand mathematical ideas."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

13.] Consider the following statement: "I am confident using graphing technology (e.g. graphing calculators, online tools) to explore mathematical problems."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

14.] Have you ever used Desmos yourself for homework, projects, or exploring math on your own?

(1) Yes, frequently, (2) Yes, occasionally, (3) Rarely, (4) Never.

15.] Consider the following statement: "I am confident using Desmos to perform more advanced tasks (for example, animations, tables, etc) other than just graphing functions or calculating numerical values."

(1) Strongly Agree, (2) Agree, (3) Disagree, (4) Strongly Disagree.

16.] Have you ever had a teacher or professor use Desmos in a class to demonstrate mathematical ideas?

(1) Yes, in college, (2) Yes, in high school, (3) Yes, in both, (4) No.

17.] Have you ever learned from Desmos (for example, by watching demonstrations, tutorials, or visualizations) without actively using the tool yourself?

(1) Yes, (2) No.

18.] What strategies or tools have been most helpful for you in learning mathematics in the past?

19.] What do you expect (or hope) technology, such as Desmos, will add to your learning experience in this course?
